

Manifest for Caroline Selnes

Hi my name is Caroline Selnes I am from Norway and I am running for the position as International Officer. I believe that in the next few years the main case and focus is going to be the rise in fees. That is great for the university, because they have to figure out how the school can actually gain students after the rise. **This is why I believe that the position of the international officer is more important than before.**

Someone needs to **remind** the RSU and the school administration that the focus should also be on the international students and **to ask questions** about the international reaction in the outcome of the rise and how to prevent international students from choosing other schools instead of Roehampton.

I know this school very well already, even though I have only been here for one year. I have socialised with people from all colleges, British students and international students. I have played cricket for the first time in my life and actually watched a real rugby match. When it comes to societies I was on the team that started up the new RUBC (Roehampton University Business Club). The first **Student Council** was set this school year and I have already represented the international students in both of the meetings. I really enjoyed this role and I am hoping to continue with this.

Why will I be a **good** International Officer?

I am a **dedicated** person in general, but especially as a representative. I have the **experience** of talking “politics” and when it comes to student councils, I am **confident** and very capable of representing a case no matter what my own opinion is. I am a good representative because I have social experience with several nationalities here in this university and I am good at **asking students questions and for their opinion on a case before I represent it**. I believe that every opinion is right for that person and that shall be respected.

What can I **offer the students** as an International officer?

I can offer you as a student a devoted officer that has **experience** in leading the Student Council at A-Level and as a leader in the state of the School Student Union of Norway.

I can offer you a social and **dedicated** officer that knows the best of both worlds to represent you.

I can offer you a voice.

Caroline Selnes
